Rob Pataki

Freelance Front-end developer

Based in London, Brick Lane

rob@handcrafted.studio

About

I am a Freelance Front-end developer with 10+ years of UI design and animation experience; and 5+ years experience in building interactive multimedia applications using open HTML technologies. I specialise in building responsive web applications with the main focus on seamless, performant user experiences and interactive animations.

Being a freelancer gives me the perfect opportunity to help businesses and creative agencies. I use my expertise to give their web based products a smooth user experience in desktop browsers, and to make them feel native on handheld devices. I enjoy taking ownership of small projects, as well as working on bigger projects as part of a team. I am always looking for new challenges, and I am keen to learn new technologies, improve my skills and meet awesome people.

In my free time I am slapping my bass, going to live gigs, do yoga, and I am perfecting my vegan cooking skills.

Skills

Coding Skills

HTML, vanilla JavaScript, jQuery, CSS, animation, MV*?$# framework, (and I do a bit of PHP and Ruby too), unit tests

Most used JavaScript Libraries

Greensock, PIXI, FastClick, Underscore, jQuery, Brewser

Preferred MV* Frameworks

Custom framework using requirejs/CommonJS best practices, Angular, Backbone

Preferred Tools

Chrome, Terminal, Git, Sublime Text 3, MacDown, Photoshop, Illustrator, Invision, DropMark, Slack, Project Management tools (Trello, Jira, Assembla, Pivotal Tracker), Harvest

| Experience | Freelance Front-end developer | 06/2013 - Today |

Freelance Front-end developer — 06/2013 - Today

I have been working with inspiring teams such as **ustwo Studio**, **Reform London**, **Crew Studio** on projects for distinguished clients like **Oakley**, **Barclays**, **Nissan**, and **Unilever**.

Front-end developer

Unboxed Consulting, London UK — 04/2012 - 06/2013

At Unboxed I worked with a bunch of super talented Ruby developers in a completely agile environment, where I learnt loads about **Git**, **scrum**, **TDD**, **BDD** and many more. During my time there I was mainly working on client side as part of a big agile team working on products such as the **FutureLearn** website, some **GDS** products, or the **Channel Five** website.

Creative Technologist

Waste Creative, London UK — 10/2009 - 04/2012

I finally decided to move to London and I landed a job at the awesome team of Waste Creative. With clients such as **Sega**, **British Gas**, **Fiction Records**, **Cartoon Network** and **Disney**, I had lots of opportunities to learn new skills, perfect my English, and start the transition of moving away from **Flash** towards the more open **HTML** technologies.

Lead product designer / Flash developer

Artklikk, Budapest HUN — 04/2009 - 10/2009

UI Designer / Flash animator & developer

Naiad Interactive, Budapest HUN — 12/2008 - 04/2009

Clients: **Magyar Telekom**, **Budapest Card**, **The German National Tourist Board**

UI Designer / Flash animator & developer

Carussel Group, Budapest HUN — 04/2012 - 06/2013

Clients: **Opel**, **Porsche**, **Audi**, **Seat**, **Volkswagen**

UI designer / Flash animator & developer

Carnation, Budapest HUN — 05/2006 - 02/2007

Clients: **Telenor**, **Nivea**, **Microsoft**, **Bosch**, **Honda**

Education

SZÁMALK Budapest - Multimedia Technology: HND, 2006
